

1.) GENERAL DETAILS

2.) Type of Road *

Select

3.) RD of inspection

1.) From RD (in m) *

2.) To RD (in m) *

4.) Physical status of work *

Select

5.) Present status of work *

Select

6.) QUALITY ARRANGEMENTS-OBSERVATIONS

7.) Whether field laboratory established *

Select

8.) Whether location of field laboratory is same as indicated by ULB in format part-I *

Select

9.) Whether necessary equipments as indicated in part-1 are actually available *

Select

10.) Whether equipment's have been used *

Select

11.) If all necessary equipments are not available, whether you have verified them with the list of deficient equipment's provided by ULB in format Part-I *

Select

12.) Whether contractor's engineer as per Part-I of this format, is available at site *

Select

13.) If contractor's engineer as per Part-I of this report is not available, whether you are satisfied with alternative arrangement made to maintain QCR *

Select

14.) Quality of Material and Workmanship

1.) Location (RD)

2.) Conforms to Grading *

☐ Yes ☐ No

3.) Material Suitable from plasticity angle *

☐ Yes ☐ No

4.) Dry density (in kN/m³) *

5.) % Compaction *

6.) Whether compaction is adequate *

☐ Yes ☐ No

7.) Thickness as per DPR (in mm) *

8.) Measured Thickness (in mm) *

9.) Prescribed Thickness provided *

☐ Yes ☐ No

15.) Whether GSB has been constructed in layers *

Select

16.) Whether compaction has been done as per the provision in DPR *

Select

17.) Item Grading *

Select

18.) BASE COURSE: 1st Layer

19.) Provision made in the first layer in sanctioned DPR *

Select

20.) Item execution status *

Select

21.) Actual execution in first layer of the Base course *

Select

22.) Reason for change in actual execution at site w.r.t provision made in DPR

23.) Quality of Material and Workmanship of BASE COURSE - 1st Layer

1.) Location (RD)

2.) Grading of Aggregates *

Select

3.) Plasticity of Filler material *

Select

4.) Volume of filler material percent of coarse Aggregate *

5.) Compaction based on volumetric analysis *

Select

6.) Design thickness as per DPR (in mm) *

7.) Thickness of each layer of WBM/ WMM (in mm) *

8.) Thickness adequate *

Select

24.) Item Grading *

25.) BASE COURSE: 2nd Layer

26.) Provision made in the 2nd layer in sanctioned DPR *

27.) Item execution status *

28.) Actual execution in 2nd layer of the Base course *

29.) Reason for change in actual execution at site w.r.t provision made in DPR

30.) Quality of Material and Workmanship of BASE COURSE - 2nd Layer

1.) Location (RD) *

2.) Grading of Aggregates *

Select

3.) Plasticity of Filler material *

Select

4.) Volume of filler material percent of coarse Aggregate *

5.) Compaction based on volumetric analysis *

Select

6.) Design thickness as per DPR (in mm) *

7.) Thickness of each layer of WBM/ WMM (in mm) *

8.) Thickness adequate *

Select

31.) Item Grading *

Select

32.) BITUMINOUS BASE COURSE

33.) Provision made in the sanctioned DPR *

Select

34.) Item execution status *

Select

35.) Actual execution at the site *

Select

36.) Thickness of layer as per DPR in mm *

37.) Type and grade of binder used *

38.) Brand name of bitumen *

39.) Whether the invoices for the whole quantity of bitumen used at site are available *

Select

40.) If the invoice of sufficient quantity not available reason thereof *

41.) Bitumen Content as per DPR (in %) *

42.) Whether mix design is done: (in case of BM or DBM) *

Select

43.) Marshal stability as per mix design (in case of BM or DBM) in kN *

44.) Whether inspection of hot mix plant done by SQM /SE *

Select

45.) Quality of Material and Workmanship of BITUMINOUS BASE COURSE

1.) Location (RD) *

2.) Grading of Coarse Aggregates *

Select

3.) Laying Temperature of the mix as per Norms *

4.) Bitumen content % As per Norms *

5.) Bitumen content % As measured by SQM *

6.) Bitumen content % *

Select

7.) Marshal stability as per Norms (KN) *

8.) Observed thickness of layer as measured by SQM *

9.) Observed thickness of layer (mm) *

46.) Item Grading *

47.) BITUMINOUS SURFACE COURSE

48.) Provision made in the sanctioned DPR *

49.) Item execution status *

50.) Type of bituminous surface executed *

51.) Thickness of layer as per DPR in mm *

52.) Type and grade of binder used *

53.) Brand name of bitumen *

54.) Whether the invoices for the whole quantity of bitumen used at site are available *

55.) If the invoice of sufficient quantity not available reason thereof *

56.) Bitumen Content as per DPR (in %) *

57.) Whether mix design is done: (Only in case of SDBC or BC) *

58.) Marshal stability as per mix design (Only in case of SDBC or BC) in kN *

59.) Any signs of distress on surface *

Select

60.) Quality of Material and Workmanship of BITUMINOUS SURFACE COURSE

1.) Location (RD) *

2.) Grading of Coarse Aggregate *

Select

3.) Laying temperature of the mix as per the test result *

4.) Bitumen content % As per Test-I *

5.) Bitumen content % As measured by SQM *

6.) Bitumen content % *

7.) Observed thickness of layer As measured by SQM *

8.) Observed thickness of layer *

9.) surface unevenness *

61.) Item Grading *

62.) SHOULDERS

63.) Item execution status *

64.) Quality of Shoulders

1.) Location (RD) *

2.) Quality of the Material from hand feel test *

3.) Degree of Compaction As per Test result *

4.) Degree of Compaction As measured by SQM (%) *

5.) Degree of Compaction *

6.) Camber As per DPR (%) *

7.) Camber as measured by SQM (%) *

8.) Camber Grading *

65.) Item Grading *

66.) CEMENT CONCRETE PAVEMENTS

67.) Type of Cement Concrete Pavement *

68.) Provision made in the sanctioned DPR *

69.) Item execution status *

70.) Grade of Concrete as per DPR *

71.) Expansion Joints Sealing *

72.) CC pavement length proposed as per sanctioned DPR

1.) Proposed length (in m) *

2.) Executed length (in m) *

73.) Observations should be made for each portion of the CC course

1.) Reference RD of CC pavements From (in m) *

2.) Reference RD of CC pavements To (in m) *

3.) RD at which observation was made (in m) *

4.) Quality of Concrete pavement *

Select

5.) 28 days Strength of Concrete as per Norms MPa *

6.) Quality of Work man's hip wearing surface, joints, edges etc

Select

7.) thickness As per DPR (mm) *

8.) Thickness As measured by SQM (mm) *

9.) Thickness acceptable *

☐ Yes ☐ No

74.) Quality of cuts and joints is acceptable *

Select

75.) Whether the joints have been properly filled with a sealant *

Select

76.) Whether surface texture of the pavement is acceptable *

Select

77.) Whether any honeycombing observed on edges of pavement *

Select

78.) Whether adequate camber is provided *

Select

79.) Check strength with rebound hammer; is it acceptable *

Select

80.) Item Grading *

Select

81.) OVERALL GRADING OF WORK

82.) Quality Control Arrangements

1.) Awarded Grades *

2.) Awardable Grades *

Select

83.) Attention to Quality

1.) Awarded Grades *

2.) Awardable Grades *

84.) Geometrics

1.) Awarded Grades *

2.) Awardable Grades *

85.) Granular Sub-base

1.) Awarded Grades *

2.) Awardable Grades *

86.) Base Course (WMM-II)

1.) Awarded Grades *

2.) Awardable Grades *

Select

87.) Base Course (WMM -III)

1.) Awarded Grades *

2.) Awardable Grades *

Select

88.) Bituminous Course (BM and DBM)

1.) Awarded Grades *

2.) Awardable Grades *

Select

89.) Bituminous Surface Course (OGPC/ Seal coat/ SD/SDBC)

1.) Awarded Grades *

2.) Awardable Grades *

Select

90.) Shoulders

1.) Awarded Grades *

2.) Awardable Grades *

Select

91.) Cement Concrete Pavements

1.) Awarded Grades *

2.) Awardable Grades *

Select

92.) Overall Grading

1.) Awarded Grades *

2.) Awardable Grades *

Select

93.) Inspection image

1.) Add image *
