1. Overview / □□□□□□

Parakh (□□□) is a comprehensive digital platform developed by the Madhya Pradesh State Electronics Development Corporation (MPSEDC). It enables government departments, agencies, and citizens to digitally fill inspection forms, conduct surveys, collect field data, and view reports — all through a unified web and mobile application.

2.1 Inspection & Survey Workflow / □□□□□□□□□ □□□□ □□□□□□□□□□ □□□□□□□□□□□□

The diagram below describes how inspections flow through the Parakh system:

2.2 Divisional Officer — Independent Governing Body / □□□□□□□□ □□□□□□□□ — □□□□□□□□□ □□□□□□□□□ □□□□□

The Divisional Officer sits alongside Admin as a separate, independent governing body — not beneath it in the same create/manage chain shown above. A Divisional Officer can: (1) view multiple inspections with their scope across every State Admin within that division, (2) also assign inspections, and (3) create/manage users at division scope — spanning multiple districts under the Collector reporting line. Admin retains its own hierarchy — Nodal Officer, Reporting Officer, Inspector/Field Surveyor — exactly as before; the Divisional Officer operates from outside that chain, with division-wide visibility, assignment, and user-management capability.

13. Enhancement Update — Indore Inspection Forms / □□□□□□ □□□□□□ — □□□□□ □□□□□□□□ □□□□□

A separate Enhancement User Manual (“Indore Inspection Forms — District GIS Parakh, v2.0”) documents a screen-by-screen walkthrough of the Indore Inspection Forms module across two phases: Phase 1 — Indore Collectorate workflow (State Admin setup, Reporting Officer & Inspector creation, inspection review and Verify/Reject actions) and Phase 2 — Divisional hierarchy (Divisional Officer login, division-wide visibility across all eight districts of Indore Division, user creation at division scope, asset assignment, and division-level reporting). The consolidated status, as observed during the latest walkthrough, is summarised below; full step-by-step detail is in that separate manual.
